Home News.

Sheriff J. P. Gabriel made a flying trip up the San Pedro this week.

Six thousand pounds of beef are consumed every week in the Florence market.

A gentleman from San Francisco is endeavoring to secure a suitable building in which to open a restaurant.

Five bars of bullion were received from Globe, Thursday, three from Mack Morris and two from Centennial.

The mother of our townsman, Mr. Ochoa, accompanied by his sister and two nieces, returned to Tucson Monday.

Mr. Hill Darrmitt returned Monday from Tucson, and says everything is quiet and prosperous in the ancient and honorable pueblo.

The Sheriff's sale of personal property belonging to Pinal Copper Company, advertised to take place Nov. 23d, has been postponed till Dec. 5th.

C. W. Culver, of Pinal, has sold to the Goodenough Mining Company, of Washington, D. C., the Goodenough mine, Pinal district, Pinal Co., A. T.

A dispatch from Phoenix, under date of 22d, says a small sorrel horse, with a round bare spot on the right shoulder, was stolen from Tempe last night.

A road is building from Cunningham's ranch, on the San Pedro, up to Powers' old camp, Saddle Mountain, a distance of nine miles. Six miles are now finished.

Mr. Holiday was in town yesterday getting supplies for work on the road from Riverside, twelve miles up to the crossing of the Gila two miles from junction with the San Pedro.

If you send the money in advance for anything you order, you need not pay any freight or express charges. Uncle Harris says that for you. 221 Kearny, between Bush and Sutter streets.

The social dance at the court-house, on the evening of the 11th, was a pleasant affair, and a reputation is promised at an early date. About twenty-five couples were present and the music was good.

The Richard H. copper claim on the Gila, owned by Messrs. Forbach and Ruckelshausen, is producing high-grade copper ore. It is rumored that this mine was bonded last week for a large sum.

Business at the Florence postoffice is rapidly increasing, an average of 150 letters being mailed daily, and receipts per month of first-class matter rating at 2,550 pounds and second-class matter, 3,487 pounds.

On the Rip Rap a tunnel has been run twenty feet. Ten feet more will tap the ledge fifty feet from surface. The croppings show a ledge of four feet. Messrs. McKinzie, Harvey and Rapp are the owners.

Mr. P. Bochs, formerly of the Sheriff's office, has leased Jim San's corral, and proposes soon to open a first-class, metropolitan livery and feed stable. Several stylish road wagons are now on their way here from San Francisco.

The proclamation of Governor Fremont, appointing last Thursday as a day of Thanksgiving, reached us too late for publication last week. The day was generally observed in the valley, and turkeys and plum pudding were at a premium.

Roadmaster H. J. Sowers, of the Florence Mining Bureau, leaves for Casa Grande to-morrow. He will take Mr. DePuy's place in Smith & Watzlavick's, that gentleman intending to visit his mother in Sacramento for Christmas holidays.

Under-Sheriff Whitesides reports taxes as coming in slowly, only about \$600 having been received to date. Property holders are reminded that taxes become delinquent Dec. 19th, and if not paid on or before that date, percentage is added for collection.

It is definitely announced that the O'Brien and San Carlos are the principal ones, has been sold for \$175,000. These claims are on the north side of the Gila, about ten miles above the mouth of the San Pedro.

Mr. C. E. Finch will please accept thanks for the fine cabinet specimens from the Gila Monster mine, Mineral Hill. They are wonderfully rich, and an expert prospector will assay \$750 or \$1,000. Mr. Wm. Johnson and C. E. Finch are the lucky owners.

Messrs. Evans, Allen and Roberson are putting up a comfortable adobe house on the Globe road opposite the Pinal Company's smelter. They have valuable mining interests in this vicinity and propose to pitch their tent by the side of Rio Gila permanently.

Messrs. Peter Schaffell and Aleck Barker, from Mineral Hill, were in town a few days since for supplies, and report the boom as on the increase. As the year draws to a close assessment work is the order of the day and night, and new locations are frequent.

We regret to learn that Mr. Jennings' condition is unimproved. He has been suffering for some months from an aggravated type of fever and ague, and his physicians recommend a change of climate as the only medicine that will per-

Mr. Jno. Schohusen, father of our Corner, Henry Schohusen, was brought in from the San Pedro yesterday quite ill, and is now confined to his bed at the residence of his son. The trouble seems to be pulmonary complaints and general debility. We wish him a speedy recovery.

Mr. Miller, of Tucson, has put up a good building and opened a store at Dudleyville, Harrington's ranch, on the San Pedro. A road will soon be completed from this point to the Ash Creek mines, and later, on to the coal fields. Dudleyville has a postoffice for the San Pedro and Saddle Mountain districts.

Mr. F. A. Stevens passed through Florence Sunday, en route to Globe, from where he and Mr. Cornell go to San Carlos to take charge of the post trader's store. They have both been connected with Messrs. Buckalew & Ochoa's establishment in Globe, where they made a host of friends by their courtesy and fair dealing.

Mr. Johnson, from Mineral Hill, says that ore from the Specie Paying, first south extension of the Alice, assays from \$400 to \$1,200, giving an average of \$800 per ton. This is in the bottom of the shaft which, when completed, will touch the ledge at a depth of 200 feet. Such figures as these speak for themselves in no uncertain tone.

Mr. Lew Bailey's many friends were pained to hear that his father, J. T. Bailey, of Washington, was dead. Deceased had been a resident of the District of Columbia for many years, and at different times held various offices of trust. He died at the age of seventy-three, leaving a wife and thirteen children to mourn him.

The Silver Seal, Mineral Hill, owned by Messrs. Rapp, Sullivan, Birchard and Goodfellow, looms up as a future bullion producer. Has a shaft of only twenty feet, but this depth will be increased soon, as a force of men will be put to work next week and developments pushed rapidly. Ore, galena and carbonate, assaying from \$40 to \$100, well defined vein.

We noticed some very neat work in the Recorder's office this week. Two patents for the Globe Lode mine and Globe Ledge mine, in the name of B. W. Reagan, were filed for record and the plans neatly and accurately transcribed in the proper books. These are the claims located in 1875 by Mr. Reagan and others near Globe, and from which that camp took its name.

Mr. E. F. Kellner, an enterprising merchant of Globe, has purchased a steam road engine, with a hauling power of thirty tons. Its cost was \$7,000 and it is intended to supplant mule power in bringing freight from Wilcox, and its use will necessitate bridging the Gila. It will have a demoralizing effect on the gentle mule and the prospectors' guileless burro.

The jail has only two lodgers at present, Jesus Bufada from Pinal, in for burglary, and S. O. Gorham, adjudged insane, awaiting transportation to Stockton. The latter was committed Nov. 2d, and it would seem economy to ship him as soon as possible. He is a daily expense to the county, and as there is no immediate probability of reduction in railroad fares, would it not be well to get rid of him.

Work is being steadily prosecuted on the road on the river to Cottonwood camp, Mineral Hill. Men are at present engaged blasting around a point of rocks next to the aqueduct, a distance of half a mile. A quantity of lumber and machinery is at Casa Grande awaiting transportation to this camp, and as soon as the road is completed freight teams will commence hauling in building material and supplies.

Mr. Jas. B. White, a well-known mining expert from the Comstock, passed through town Monday on his way to Pinal, when he goes to survey the field for a mill for the Surpriser mine, Queen Creek, owned by the Hastings Consolidated Gold and Silver Mining Company. Mr. White brought articles of incorporation of this company with him, and they were filed in the Recorder's office, Mr. D. T. Elmore being authorized resident agent of the company at Pinal.

Mr. John Weber, conductor on the S. P. R. R., out from Los Angeles, and Mr. H. E. Cornwall, of the railroad office, same city, called last week and deposited each the price of a subscription for the ENTERPRISE. They came to examine some mines at Mineral Hill, in which they have been interested for some time, and to let contracts for assessment work on five claims. They were much pleased with the camp, and stated that our frequent notices of the district which had been the means of bringing them here, were not exaggerated.

The recent repairs, authorized by the Board and completed last week by Roadmaster George W. Blair, were on the Globe road from Little Cottonwoods, Barney's Station, to the line of Gila county, a distance of thirty miles. The heavy rains of the past season had put it up badly, in places washing the entire road bed away, leaving jump-offs and washouts from three to six feet in depth. Competent examiners, who have passed over the road since repaired, state that it is now better than ever before; that its present condition shows good work at very slight expenditure.

Judge Porter, on the 22d inst., decided the case of Leander Milner, administrator, vs. the Silver Era Mining Company in favor of the defendant. The property in controversy, three mines and a mill-site situated in Globe district, Gila county, A. T., was held by defendant under a conveyance from R. H. Watson, surviving partner of the firm of Milner & Watson. Judge Porter held that a surviving partner had the right to sell and convey the real estate of the last partnership for the purpose of paying the debts of the late firm, and his vendee takes the property discharged from any claim of the heirs or personal representatives of the deceased.

Mineral Hill Notes.

From Mr. C. D. Henry we learn that affairs generally at Mineral Hill are prosperous.

In the Alice ore is being taken out of the north croppings, which is nothing but a mass of horn silver. Some brought to town by Mr. Henry goes from \$5 to \$7 per pound. Every shot throws out this quality of metal, and by Wednesday next, ten sacks of same will be shipped to San Francisco.

On the Wee Pet, at a depth of ten feet, the assays are 50 percent lead, \$39.50 silver and \$10 gold.

The Contention mine, belonging to Los Angeles parties, shows a ten-inch vein of fine copper glance. Assessment work, on the ledge, is being done.

Between forty and fifty men are now in the camp.

A postoffice will soon be established. Mr. Henry having sent his bonds to Washington yesterday.

Silver Belle Quartz.

Mr. Linkton, general manager of the Pinal Consolidated Mining Company, called Saturday on his return from the company's property, eight miles south-east of Mineral Hill, and reported progress, expressing satisfaction with present developments and an assurance of a future filled with dividends and bars of bullion. This corporation has, so far, secured only two mines in this district, the Silver Belle Quartz and the Columbia, believing it wiser to thoroughly develop two good claims than to have a dozen lying idle. There are now 1,300 tons of fine ore in sight in the former, which can be easily taken out when reduction works are ready.

The road from the mines to the mill-site on the Gila will be six miles in length, of which four miles are completed. The smelter is building opposite Stiles' "stone house," on the river, and the company's camp at this point will be known as the "Buttes," taking its name from two lofty up-shoots of mineral near by. It is expected that the whistle of the furnace will be heard February 1st, scoring another success for Pinal county.

Mr. Linkton visited Picacho on the 18th inst., in company with Mr. Jas. Simpson, to examine the road from that point and determine the advisability of freighting from there to his camp, instead of via Casa Grande. He has not decided whether to make the change or not, as the saving in distance will probably be offset by the additional railroad charges.

The Martinez has been bonded by Mr. Linkton and some San Francisco friends, individually, not for the company as stated in our last issue. Work will be commenced immediately on the claim which, in its croppings, gives evidence of permanency and value. Mr. Linkton's views of this camp, which he calls Bell-aire, are more than sanguine. He expresses an earnest conviction that the half of its wealth is not even guessed at, and that a good showing will be made from the surface down. He said many kind words for the ENTERPRISE and congratulated this paper on the good work it was unquestionably doing for mining in Pinal county. We append below his last report:

PINAL, November 13.  
The Columbia tunnel is in 270 feet—31 for week. Silver Belle tunnel in 110 feet. At a distance of 100 feet we struck a body of carbonate ore about three feet wide, which still shows the same in the face of the tunnel. Have stopped work in tunnel for a day or two until we can cut out a station for a winch, which we intend to sink in ore. Ore looks very promising and carries a high per cent of lead. Have run several cross-cuts and upraises in different parts of the mine. Some show good ore and others nothing. Wagon road to mine will be completed by middle of December.

S. LINKTON, Supt.  
Since writing the above we have received the following from the Superintendent, under date of November 21st: Columbia tunnel is in 313 feet. Silver Belle tunnel is in 120 feet and the whole face of the tunnel shows good carbonate and galena ore. Winch No. 1, below Silver Belle tunnel, is down thirty feet. The vein is fully ten inches wide and is all good carbonate and galena ore, with boulders of free ore mixed with it. The boulders are frequently covered with horn silver. This I consider a very important development, as it proves that the ore extends down. The bottom of the winch is 160 feet below the surface. Work on the road progressing well.

S. LINKTON, Act. Supt.

Cababi.  
Mr. Aaron Mason returned yesterday from a visit to the Cababi mine, where he is in company with Mr. Donnelly and others went to examine properties of Messrs. L. G. F. Yeager and O. A. Brown. This district is in the Cababi mountains, Pima county, about ninety miles southwest of Florence, and for the past twenty years has been famous for large and exceptionally rich ledges. The Fernandez, now in litigation, produces ore ranging from 150 to 200 ounces. The formation is porphyry, ledges vary in width from four to six feet, and are easily traced the entire length of claims. Large quantities of bullion have been taken out and work was abandoned only on account of water. Mr. Donnelly has taken samples of the ore to San Francisco, and if assays are satisfactory, intends to ship a ton or more from each mine for a working test.

Reports from the Owl Head district are encouraging. The Chief mine has a shaft 18 feet, vein 5 1/2 feet, all of which gives 17 1/2 per cent copper and \$54 silver. The Queen, first extension, shows same ore on surface as Chief. Little work has been done here. The Edison, second extension, has a ten-foot shaft, 40-inch vein, giving \$70 silver and 35 per cent copper. In the shaft of 13 feet is a vein of four feet, ore from which has worked \$174 in silver and 42 per cent copper. Chico, same ledge, no work. Mr. Peterson is down 42 feet on Silver Chief, and returns give 519 ounces silver and a large per cent copper. The pay-streak is one foot and vein 4 1/2 feet wide.

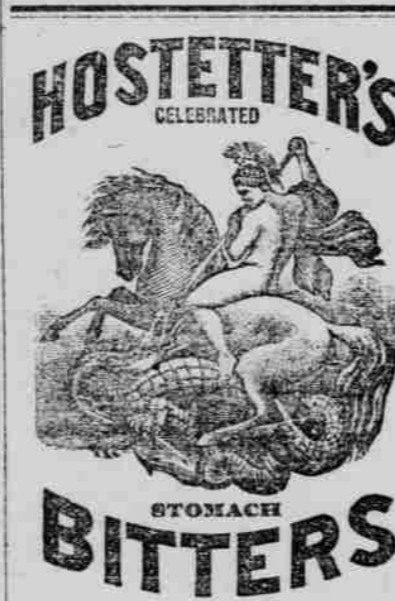

Silver King and Florence Telegraph Co.

The first meeting of the promoters of the above entitled corporation was held in Florence yesterday, when the following officers were elected: Aaron Mason, President; A. Venton, Vice-President; Wm. E. Guild, Secretary, and Geo. A. Brown, Treasurer. The Secretary stated that the stock book of the company had been received and he was directed to duly publish the fact. The capital stock is \$10,000, divided into 1,000 shares of \$10 each. The shares are beautifully lithographed on parchment paper and handsomely bound in cloth. Most of the stock is already engaged, and as soon as the scrip is delivered and sufficient money is in the treasury to meet payments, material will be ordered and work commenced. This will probably not be more than ten days or two weeks, and every effort will be made to hasten the completion of the line and place the principal mining centres of Pinal county in telegraphic communication with each other and the outside world. A party will take the field Monday to stake out the route, which will be via Mineral Hill. There will be required to build the road, 13,750 lbs. of wire and 1,000 poles of sawed redwood, 8 inches square at the butt and 5x5 inches at the top.

Too much credit cannot be given the gentlemen who have so rapidly brought this commendable enterprise to successful completion.

The following will be of interest to prospectors and others, who may contemplate "jumping" claims on Dec. 31st:

A miner making a location this year has until January 1, 1883, to perform the necessary labor, and the claim cannot be jumped and held before that time. It is untrue that the "jumping" season dates from the location of the claim, or, in other words, that if a mine is located on the 27th of October 1882, it can be jumped on the 27th of October, 1882, if it has not received the assessment work. The law was made to protect the poor man. A miner, without means, locating a valuable claim on the 31st of December, could hardly perform \$100 worth of labor the morning of January 1, 1882. The "jumper" must wait until January, 1883.

Though Shaken in Every Joint  
And filled with fever and ague, or biliousness, the system may yet be freed from the malignant virus with Hostetter's Stomach Bitters. Protect the system against it with this beneficent anti-spasmodic, which is furthermore a supreme remedy for liver complaint, constipation, dyspepsia, debility, rheumatism, kidney troubles and other ailments.
